

Hospitals in surrounding states send their surplus medical equipment and supplies to Rotary's Medical Supplies Network, Inc. Each month approximately 9,500 pounds of medical equipment and supplies are shipped from our Tulsa warehouse to a developing nation somewhere in the world. MSNI also keeps some of this equipment for local use.

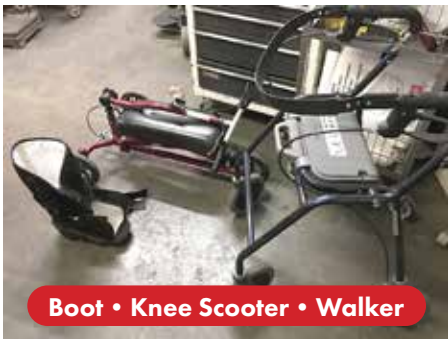

Walkers

Infant resuscitator

Hospital Beds

Boot • Knee Scooter • Walker

Get involved with MSNI by helping out from time to time at the MSNI warehouse. It's located near 11th and S. Erie. Tulsa OK.

Spend a few hours repacking small supplies and marking inventory sheets needed for shipping and customs. Nothing heavy, nothing hard. But this absolutely affects lives overseas.

While there, see what MSNI has in the warehouse. If you know of a need in your area MSNI can meet, let it be known. Most likely it will be made available at no cost.

Power Scooter

The kind of items you'll be counting and putting into boxes might be packages of syringes, boxes of needles, catheters, boxes of gloves, surgical blankets and a multitude of other items clinics and hospitals overseas are in need of. Check out the web site at www.MSNI.org

One person counts items while another fills out the inventory sheet.

This can be an excellent way to work with kids in a new & interesting way to help others.

Being able to write neatly is just about the only requirement for filling out the inventory sheet.
